Transcend Wide-Temp SSDs & DRAM Modules

Reliable Storage for Critical Mobility

Transcend's industrial wide-temperature SSD and DRAM solutions are engineered for demanding transportation applications where storage devices must operate reliably under extreme conditions. Enhanced with Corner Bond technology, the embedded SSDs deliver superior resistance to shock and vibration, making them ideal for in-vehicle systems continuously exposed to movement and mechanical stress. Transcend's industrial DRAM modules are JEDEC-compliant and equipped with ECC support, enhancing system stability and improving data processing efficiency across automotive platforms.

Conformal Coating

A customizable protective layer that shields Flash & DRAM products from environmental corrosion, chemical contaminants, dust, and other harsh conditions.

Corner Bond

Improves SSD reliability by reinforcing key components with acrylic adhesive for added mechanical stability.

Power Loss Protection (PLP)

Enhances data integrity in the event of sudden power outages.

Featured Products

PCIe Gen4 x4
U.2 2.5"

UTE210T-I

SATA III 6Gb/s
M.2 2280

MTS970P

SATA III 6Gb/s
M.2 2242

MTS570P

DDR4 Wide Temp
DRAM Modules
